

AUTISM-SPECIFIC ASSESSMENT CLINIC

AEIOU's team of highly qualified Assessors provides timely, affordable, autism-specific standardised assessments to children across Queensland up to 18 years of age.

Our assessments support families and educators to better understand a child's skills, preferences, strengths and needs, and support health professionals, like paediatricians and psychologists, in determining a diagnosis of autism.

Our expert team

Our team of Assessors hold psychology (honours) degrees, and have specialised clinical training, ADOS accreditations, and experience working with young children with autism.

Where is the clinic?

The Assessment Clinic is located in Spring Hill, Queensland.

Outside of Greater Brisbane, we may be able to arrange assessments within an AEIOU centre near you.

How much is an AEIOU assessment?

All assessments are privately funded at this stage. AEIOU assessments are not eligible for Medicare or private health rebates, or NDIS funding. See other page for costs/prices.

A note about diagnosis

Our clinic does not provide diagnoses or diagnostic decisions. In line with best-practice guidelines, we recommend your health practitioner reviews the Assessment Report to determine a diagnosis.

We're here to help create smoother and faster processes for autism assessment, diagnosis and access to intervention.

WHICH ASSESSMENTS DO WE OFFER?

Full Autism Assessment

Location

AEIOU
Assessment Clinic

What:

An assessment suite and clinical report tailored to identify and capture autism symptoms and behaviours.

Report includes:

- **Mullen Scales of Early Learning (MSEL)** – Learning and language skills (*for children aged 3-5*)
- **Autism Diagnostic Observation Schedule (ADOS-2)**
- **Vineland Adaptive Behaviour Scales (VABS-3)** – adaptive and maladaptive behaviours, daily living, socialisation, and community skills
- **Gilliam Autism Rating Scales (GARS-3)** – autism characteristics and repetitive/restricted behaviours
- **Sensory Profile (SP-2)** – sensory processing patterns
- **Social Responsiveness Scale (SRS-2)** - Socialisation skills and difficulties
- **Information about a child's skill set and current concerns**
- **Developmental history**

Who:

Children aged 3 – 12 years

Cost:

\$1,300 (3-5 years) or **\$1,100** (5-12 years)
(private funding only)

ADOS Only Assessment

Location

AEIOU
Assessment Clinic

What:

Administration of the ADOS-2 assessment, and a detailed report. The ADOS-2 is a gold-standard semi-structured clinical assessment that identifies characteristics and behaviours related to autism in children and adults through observation and structured activities.

Who:

Children aged 2.7 – 18 years

Cost:

\$600 (private funding only)

Individual Assessments

Location

Various

What:

- Mullen Scales of Early Learning (MSEL)
- Vineland Adaptive Behaviour Scales (VABS-3)
- Gilliam Autism Rating Scales (GARS-3)
- Sensory Profile (SP-2)
- Wechsler Individual Achievement Test (WIAT-III)

Cost: Dependent on assessment selection.

In line with best-practice guidelines, we recommend all assessment reports be reviewed by a health practitioner. We do not provide cognitive testing or intelligence testing (i.e. WISC, WPPSI).
